SIGHTRIGHT

## Introducing:

Riley are proud to introduce SightRight, the most significant step forward in snooker and pool technology and coaching since cue sports began.

SightRight is patented interactive technology designed to help players of all standards maximise their playing potential and improve their potting accuracy.

SightRight consists of four groundbreaking elements:

1. SightRight patented Sighting and Alignment Technology in Cues – the first of its kind in cue sports, approved for use by the WPBSA (World Professional Billiards and Snooker Association).
2. Interactive Coaching – learn as you play using the SightRight App on your tablet or smart phone.
3. Full Coaching Programme delivered by accredited SightRight coaches in your Club for members wanting one to one coaching to take their game to the next level.
4. Group Coaching Clinics delivered by accredited SightRight coaches to help Club members and league teams improve their game!

RILEY

SIGHTRIGHT

Integrated SightRight Technology.  
Patented & Sanctioned by the WPBSA.

## App Support:

Along with the SightRight technology in their Cue, players can access the unique SightRight app – all of our proven coaching techniques captured in an easy to use and powerful interactive training tool. Used in conjunction with the SightRight technology in the cue, the SightRight app will help players to practice and learn SightRight disciplines when they are actually at the table using a smartphone or tablet.

It is only when players have developed these disciplines to sight perfectly that they are able to accurately aim full ball, half ball, 1/4 and 3/4 balls with no bias. And if you are faced with a shot you have never practiced before, SightRight players will always out-perform those that have to learn where to aim through practice. Be the best player that you can be – no more guessing where to aim and where to strike the cue ball.

TAKE A LOOK - DOWNLOAD THE APP HERE:

Apple iOS

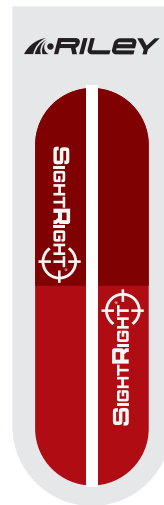

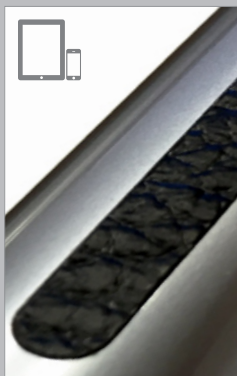

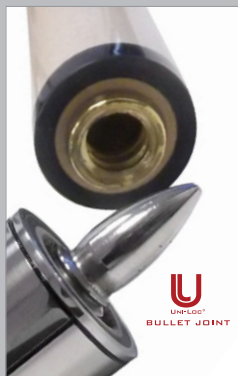

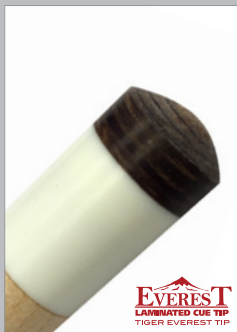

GooglePlay

Scan the code using a QR code reader on your mobile device. OR simply search "SightRight" in your app store.
