

2013 - SPORTEC SERIES

SPORTEC SERIES

Seek retribution against all opponents with the sport-inspired Sportec cues from Nemesis. Cutting edge design with metallic finishes and genuine Canadian hard rock white maple shafts make these cues not only highly functional weapons but also stunning instruments to behold. The D-Series cues feature a Posi-Tec grip for positive grip traction promoting superior ball control. The special high-impact fibre ferrule is guaranteed against chipping and cracking and the Pro Tapered shaft will allow a ultra-smooth stroke and better follow-through. Stainless Steel joints make for a solid hit and affirmative feedback. Sportec lets you become the Nemesis.
